Description

The Chronoscope X1, Version 3.0, is a top instrument for use in production, repair service and watch-testing labs. It consists of the X1 terminal with a 10.4" colour touchscreen and the Micromat C automatic microphone with integrated chronoscope measurement electronics. There are four different display modes as well as graphic representation of the beat noises. For each measurement program, individual PDF files can be stored, e.g. assembly plans, etc.

Product

Item Nr.: **11.25PK**
