## Description

The Proofmaster S was specially designed for the repair service, the specialist trade and for the testing of small series.

Pre-defined universal programs, freely programmable test cycles and intuitive menu navigation guarantee great ease of use and reliable testing for all watches.

In addition to the now legendary **Leak-Finder** program for the localisation of a watch leak, the Proofmaster S now offers **3** additional special programs for the testing of **watches with altimeter and pressure sensors**.

## Product

Item. Nr.: **31.21 PK1 / PK2**
