

Price list for calibration

Calibration includes the checking, adjustment and verification of the measured variables of your device. However, the Witschi calibration service offers you more than simply the calibration of your equipment. During incoming goods inspection, our staff also check and test all the functions and your device is fully cleaned before the actual calibration process.

Thanks to our professional inspection and maintenance service, you can expect a longer useful life from your device.

Our certificate is included in the calibration price. Would you like a measurement protocol? Then please let us know in advance. For the sum of only CHF 70.- you will receive all of the measured values before and after adjustment of the individual measured variables.

Type no.	Product	Measured quantities								Price	Remarks
		Time base	Amplitude, beat error and	Voltage	Current	Resistance	Temperature	Pressure/Senso	Torque		
11.19	Wicometre Professional	✓	✓							195.-
